School / Car

Deshler A8

Monthly Report

Deshler team of Brent Buescher and Kris Collins from Deshler will be running the A08 car. We took the break calipers off and manufactured new mounts to rotate the caliper 90 degrees, to the rear and welded them to the old arm with a short circuit welder. We took off the old door and hinge and redesigned the door to enter the car, and replaced the old hinge by grinding down the old welds. We removed the old tint from the door to better find clearances. We took off the previous decals and sponsor ships and cleaned the old glue off of the car to mount new ones later on.

Brent got all of the previous years wrap taken off and started working on designing up a new out skin for the car.

Kris got the old brake caliper
brackets taken off and new
brackets designed and made for
them.
