School / Car

Deshler A8

Monthly Report

Deshler team of Brent Buescher and Kris Collins from Deshler running the A08 car.

We had Isernhagen Tinting, tint the door to help protect us against the sun's light. We cut out new plastics and riveted the new pieces to the parts frame to better help stabilize them to not wobble while driving.

Matt's Auto Body helped us as a sponsor to prep the plexiglass for paint. We had to bleed the brakes in the front to help with stopping at a quick pace. We had to realign the front two wheels on the toe angle, Camber and Caster angles. We reshaped the back lower side to help air flow under the car and reduce drag. We also manufactured new mirror's to help better see the cars behind us.

Kris is laying the second coat of paint on the rear fin.

Brent and Kris were in the process of getting all of the old plexiglass off of the car frame here.
